**FTA Section 5310 Elderly and Persons with Disabilities Specialized Transit Program  
MTC's FY 2007-08 Application Evaluation Process**

1. Each eligible project request received was evaluated using the statewide criteria, which were developed by the California Transportation Commission (CTC). The evaluation criteria are divided into the following categories: 1) ability of applicant, 2) coordination planning, 3) utilization of existing or proposed equipment, and 4) service effectiveness.
2. MTC, as the Regional Transportation Planning Agency, convened the nine county Paratransit Coordinating Councils (PCCs) to lead each county-wide evaluation process. Each county PCC assembled a Local Review Committee (LRC) to evaluate and score the applications submitted for funding under the FTA Section 5310 program. The composition of the county teams was determined entirely by each PCC. Applicants for projects that were deemed ineligible by the LRC were notified by the county PCC.
3. MTC staff reviewed the each application to determine that the proposed project was derived from MTC's Coordinated Public Transit – Human Services Transportation Plan: Elderly and Disabled Component, and also independently evaluated the applications.
4. The LRC's scores were transmitted to MTC staff. Discrepancies between the LRC's and MTC staff's scores were discussed and resolved. MTC staff notified each applicant of their scores and the local appeal process.
5. MTC staff with representatives from county PCCs met in an open forum format to hear and resolve applicant appeals.
6. MTC staff compiled all scores for the region and developed a regional priority listing. MTC staff will present the final recommendations to the Commission for adoption. Once adopted, the final list will be transmitted to Caltrans for funding consideration.
