## Pavement Management Program Certification Listing

In accordance with section 2108.1 of the Streets and Highway Code, MTC requires cities and counties submitting pavement maintenance and rehabilitation projects for funding to utilize a Pavement Management Program (PMP).

Section 2108.1 of the Streets and Highway Codes says:

*By July 1, 1990, the City, County, State Cooperation Committee in the department shall develop and adopt a pavement management program to be utilized on local streets or highways that receive funding under the state transportation improvement program. The pavement management program shall be transmitted to every county or city for possible adoption or incorporation into an existing pavement management program. The City, County, State Cooperation Committee shall solicit recommendations from transportation planning agencies and any other entity the committee deems appropriate.*

Based on the recommendation of the joint City, County, State Cooperation Committee, the MTC will grant certification to a jurisdiction when all of the following applies:

1. The Pavement Management Program used by the jurisdiction is capable of completing all the following:
  - Storing inventory data for all roads within the jurisdiction
  - Assessing the pavement condition based on distress information
  - Identifying all pavement sections that need rehabilitation or replacement
  - Calculating budget needs for rehabilitating or replacing deficient pavement sections
2. The jurisdiction completes all the following:
  - Reviews and updates the inventory information for all roads every two years. The review will include checking for road network completeness along with checking for the accuracy of the existing management sections.
  - Completes inspection of pavement sections for arterial and collector routes in the system every two years, and residential routes every 5 years.
  - Calculates budget needs for rehabilitating or replacing deficient pavement sections for the current year and the next three years.

### To be certified please submit the following to MTC:

1. Your jurisdiction's latest updated pavement management database. If you are not using MTC PMP, please submit items #2 and #3 only. If you are using an MTC PMP software program please submit all files associated with the version of StreetSaver you are using. If you need assistance in accessing these files, please contact your [PMP coordinator](#).
2. The following 3 budget scenarios reports: 1) a report showing sections selected for treatment over the next five years based on your jurisdiction's annual budget estimates, 2) a report showing what would need to be done to maintain your jurisdiction's existing PCI, and 3) a scenario depicting a five-point increase of your jurisdiction's current PCI over the next five years. *(These types of reports are typically generated as part of the Pavement Management Technical Assistance Program (P-TAP) projects.)*
3. A signed letter by the Public Works Director, or equivalent department head, stating that all of the requirements in parts 1 and 2 above have been met. "[Sample letter](#)"

MTC will post certification status updates of Bay Area jurisdictions on this page the first day of every month. The updated certification will have an expiration date two years from the date when the last inspection of arterials and collectors in your network was completed.

### Temporary exemptions from the certification process

\* A jurisdiction may apply for a one-year extension if the department head submits a letter stating that reinspection will occur within one year. Extensions may not continue beyond three years from the last major inspection date.

\*\* A jurisdiction, whose certification is expiring, may apply for pending status if it is in the process of inspecting its network. You must notify the MTC in writing of your request for pending status, and include a reasonable date when inspections will be completed, or your certification will be considered expired. Jurisdictions who received a pending status because of their

participation with the **P-TAP project (Rounds 7 & 8) had until February 15, 2008** to submit their documentation or be considered expired. **Round-9 participants had until December 31, 2008** to submit their documentation or be considered expired. **Round-10 participants have until September 30, 2009** to submit their documentation or be considered expired.

**NOTE:** Failure to submit your PMP Certification letter and/or extension request by the above deadlines and/or your Certification Expiration Date will result in a lapse in compliance and any Pending status will revert back to its original expiration date.

The information should be forwarded to your [PMP Contact](#).
