RE: San Francisco Electric Vehicle Taxi Project Split

At the May 2012 Air Quality Conformity Task Force Meeting, the Task Force approved the exempt code for project REG110017 with the following project description and exemption code:

Electric Vehicle Taxis and Battery Switch Stations	San Francisco and San Jose: Install up to four battery switch stations. Purchase up to 25 electric vehicles for neighborhood taxi services in San Francisco. Includes project evaluation.	Launch pilot program to demonstrate both battery electric vehicles and switchable battery technology to San Francisco and San Jose's taxi services. Install up to four battery switch stations in San Francisco and San Jose. Purchase up to 25 electric vehicles.	Mass Transit - Construction or renovation of power, signal, and communications systems
--	---	--	--

This project has now been split into two projects in the TIP due to phasing issues and to facilitate tracking of the two discreet projects that made up the initial project listing. There has been no additional scope or funding added to the projects. The project has been split as follows:

REG110017	Electric Vehicle Taxi Battery Switch Stations	San Francisco and San Jose: Install up to four battery switch stations.	Launch pilot program to demonstrate both battery electric vehicles and switchable battery technology to San Francisco and San Jose's taxi services. Install up to four battery switch stations in San Francisco and San Jose.
REG110038	Electric Vehicle Taxis	Purchase up to 25 electric vehicles for neighborhood taxi services in San Francisco. Includes project evaluation.	Purchase up to 25 electric vehicles for neighborhood taxi services in San Francisco. Includes project evaluation.

MTC is seeking approval to apply the original May 24, 2012 air quality exemption code approval of "Mass Transit - Construction or renovation of power, signal, and communications systems" to both of the new TIP listings.
