RE: BATA Resolution No. 111 – Amendment to the FY 2013-14 Capital Budget

Staff is requesting an amendment to the BATA Capital Project budget to add \$250 million to fund BATA’s participation in the Transit Core Capacity Challenge Grant Program.

The Transit Core Capacity Challenge Grant Program is an ambitious program to fund replacement of the entire rolling stock for the Bay Area’s three largest transit operators, AC Transit, BART and SFMTA. Estimated cost of the entire program is \$7.4 billion with 35% coming from local contributions and the remaining balance from regional discretionary sources, including 45% from the Federal Transit Administration. The BATA contribution constitutes 5% of the regional sources and 3% of the entire program.

Funding for the program is made available from project savings as follows:

RM 1	\$ 70 million	Net savings from RM 1 closeout
SPANs	\$ 50 million	Partial savings from early retirement of bonds
Seismic	<u>\$ 130 million</u>	Reduction of project contingency
Total	<u>\$ 250 million</u>	

The remaining seismic contingency of approximately \$200 million should be adequate to accommodate unknown costs in the balance of the seismic program. There is approximately \$710 million of expense remaining in the project budget, net of contingency. In addition to any remaining contract contingency, the remaining program contingency balance of approximately \$200 million still represents 28% of the remaining project budget. Once certain toll contributions are met, BATA is authorized to move funds from the seismic program to meet other BATA program needs consistent with Sections 30913 and 30914 of the California Streets and Highways Code.

Funding of this new program is not expected to affect current or future delivery of any toll bridge projects. Our financial models expect all budgeted expenses, including contingencies, to be spent. In this instance, we are simply repurposing what the contingencies and other savings will be spent on. There is a small risk that the remaining program contingency could be inadequate to complete the remaining seismic work and has to be replaced. In this case, the most likely scenario is to restructure or reschedule future rehabilitation projects.

This Resolution supersedes BATA Resolution No. 106 for the BATA Operating and Capital Budgets. Staff recommends that this Committee forward BATA Resolution No. 111 to the Authority for approval.
