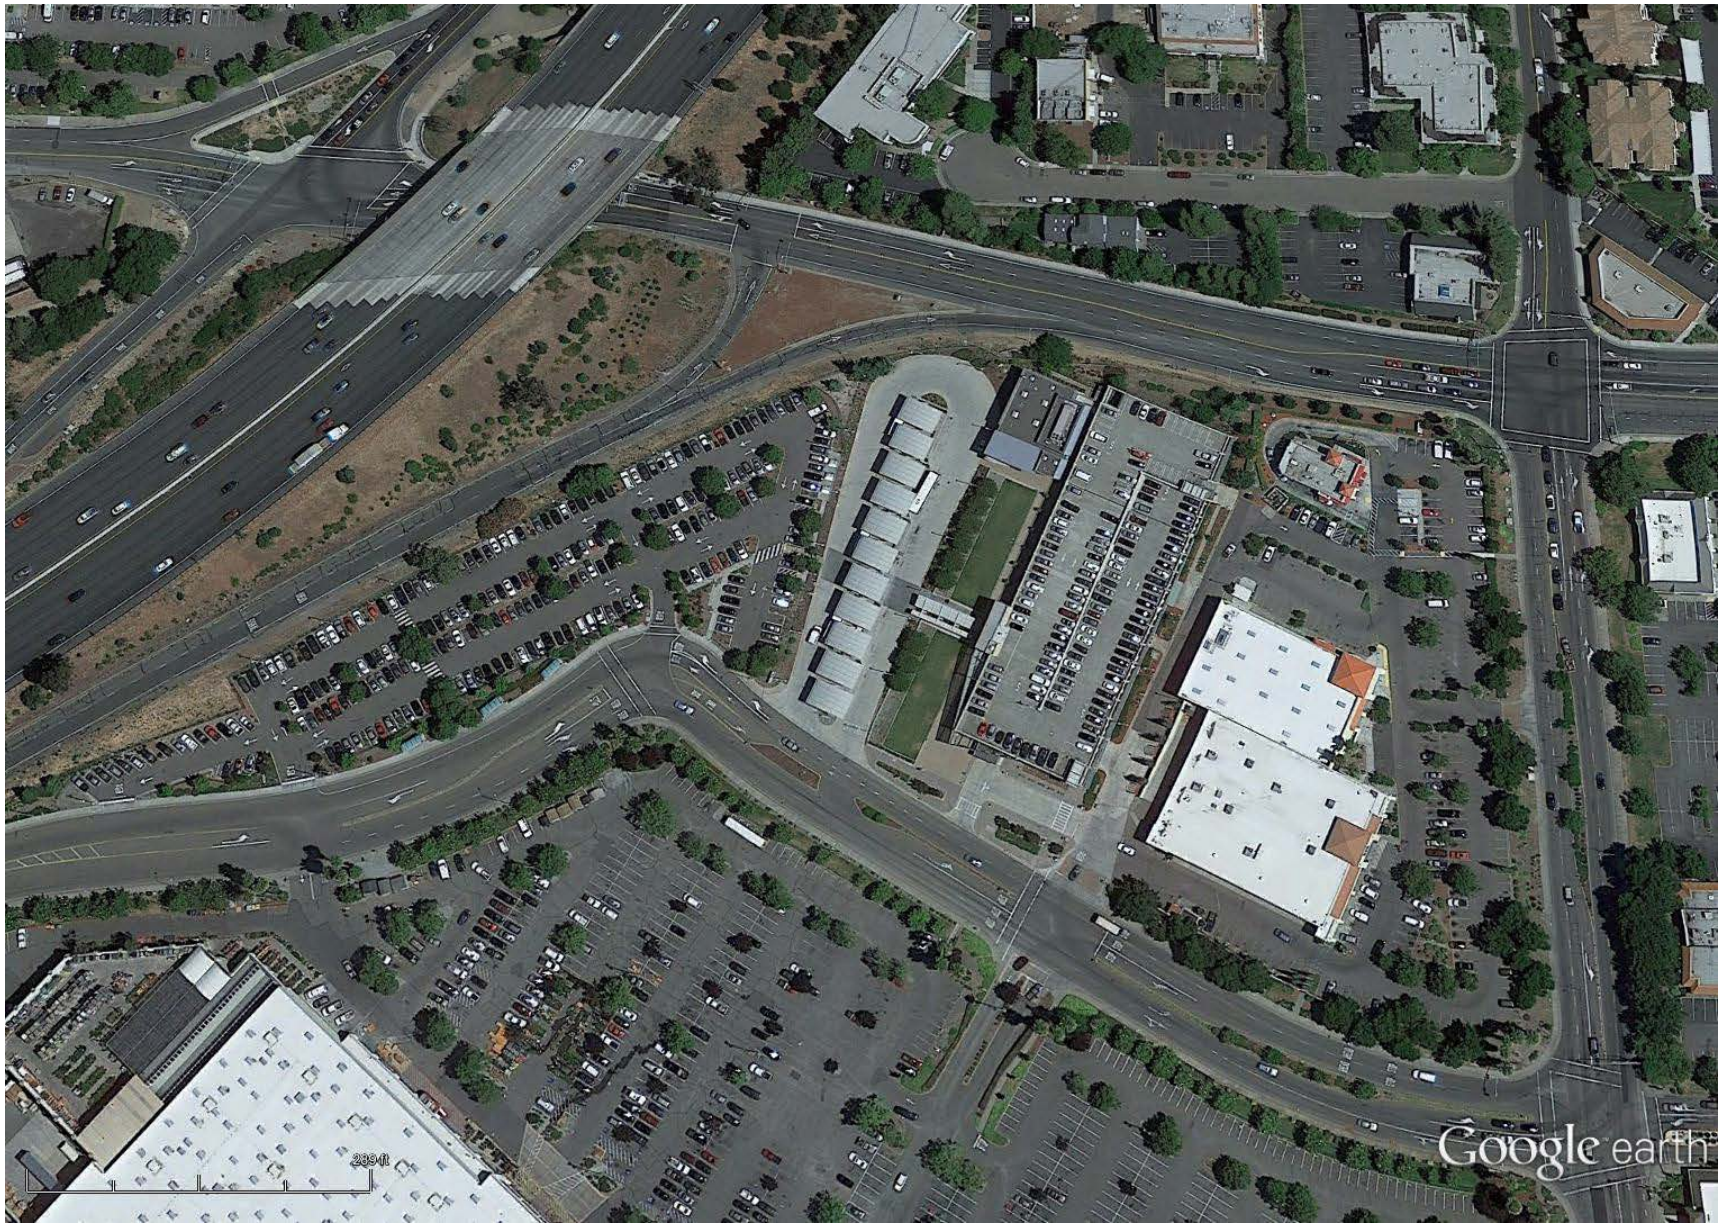
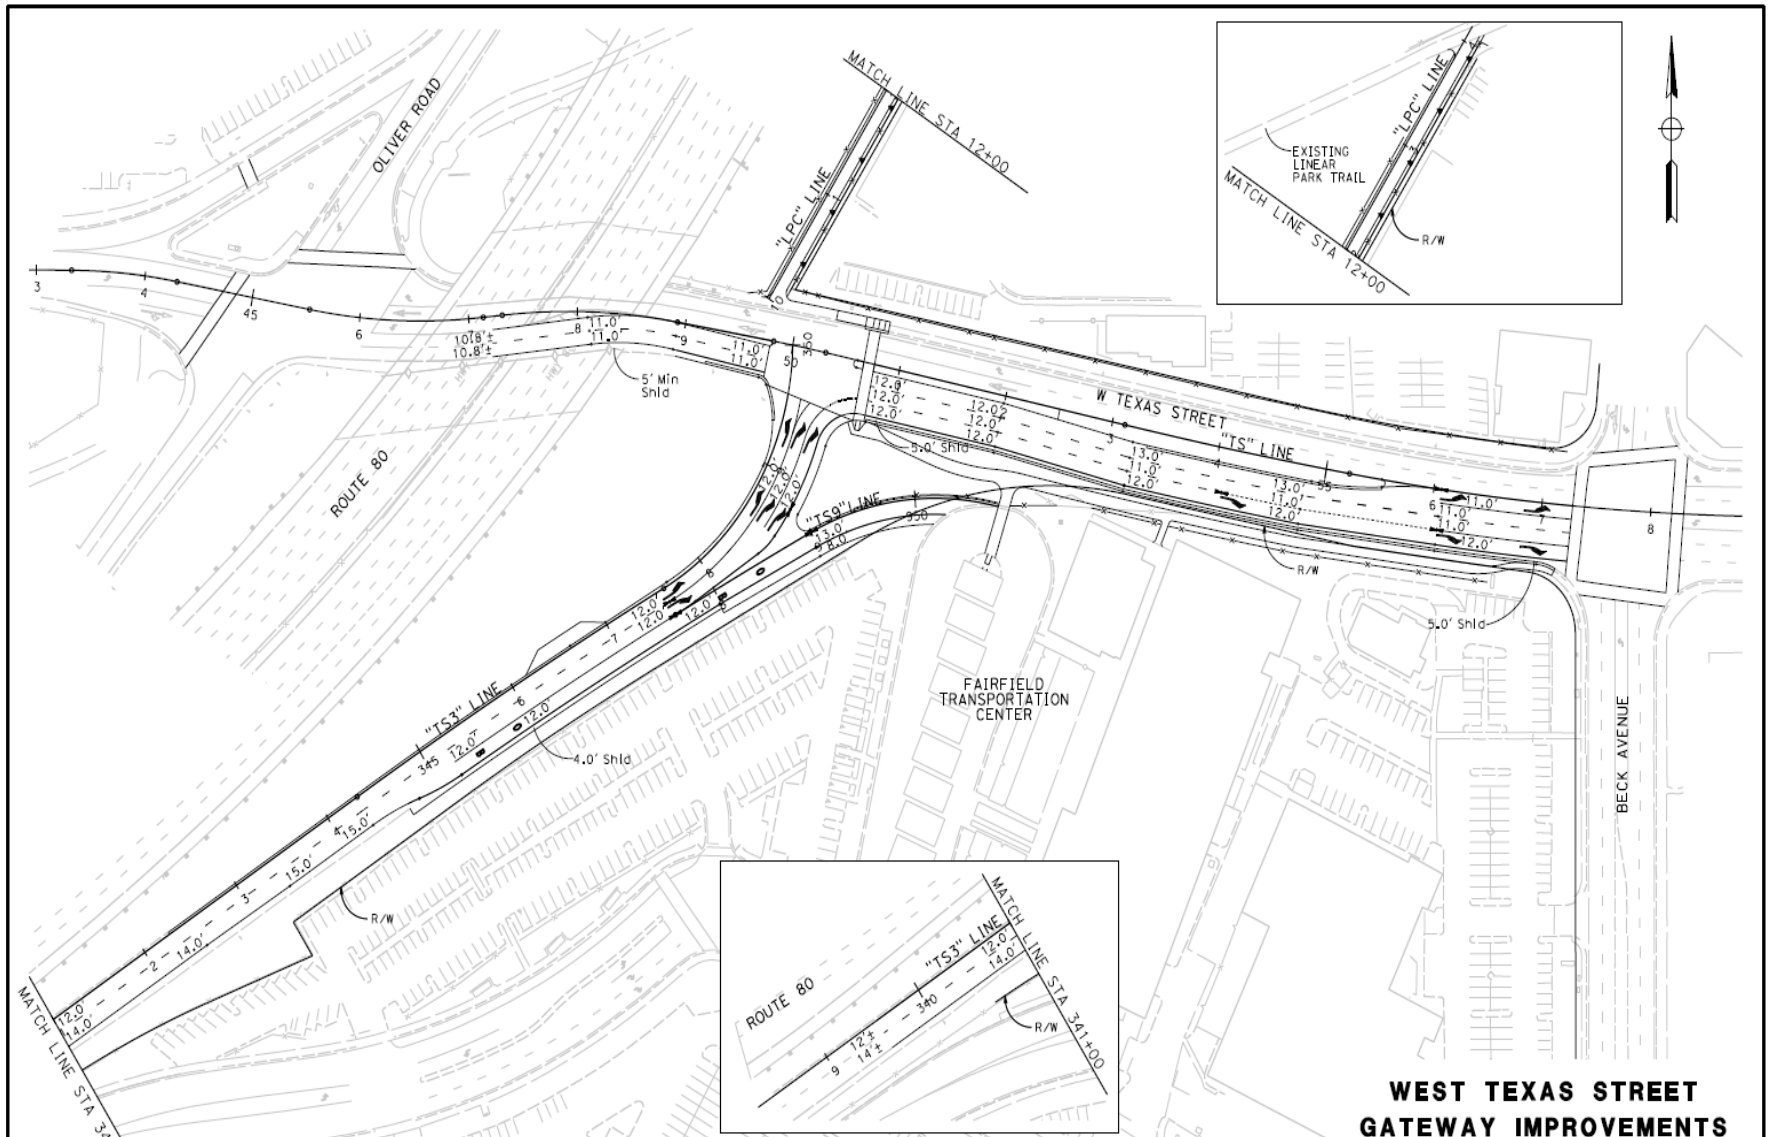
FTC Now – 640 Spaces Not Enough

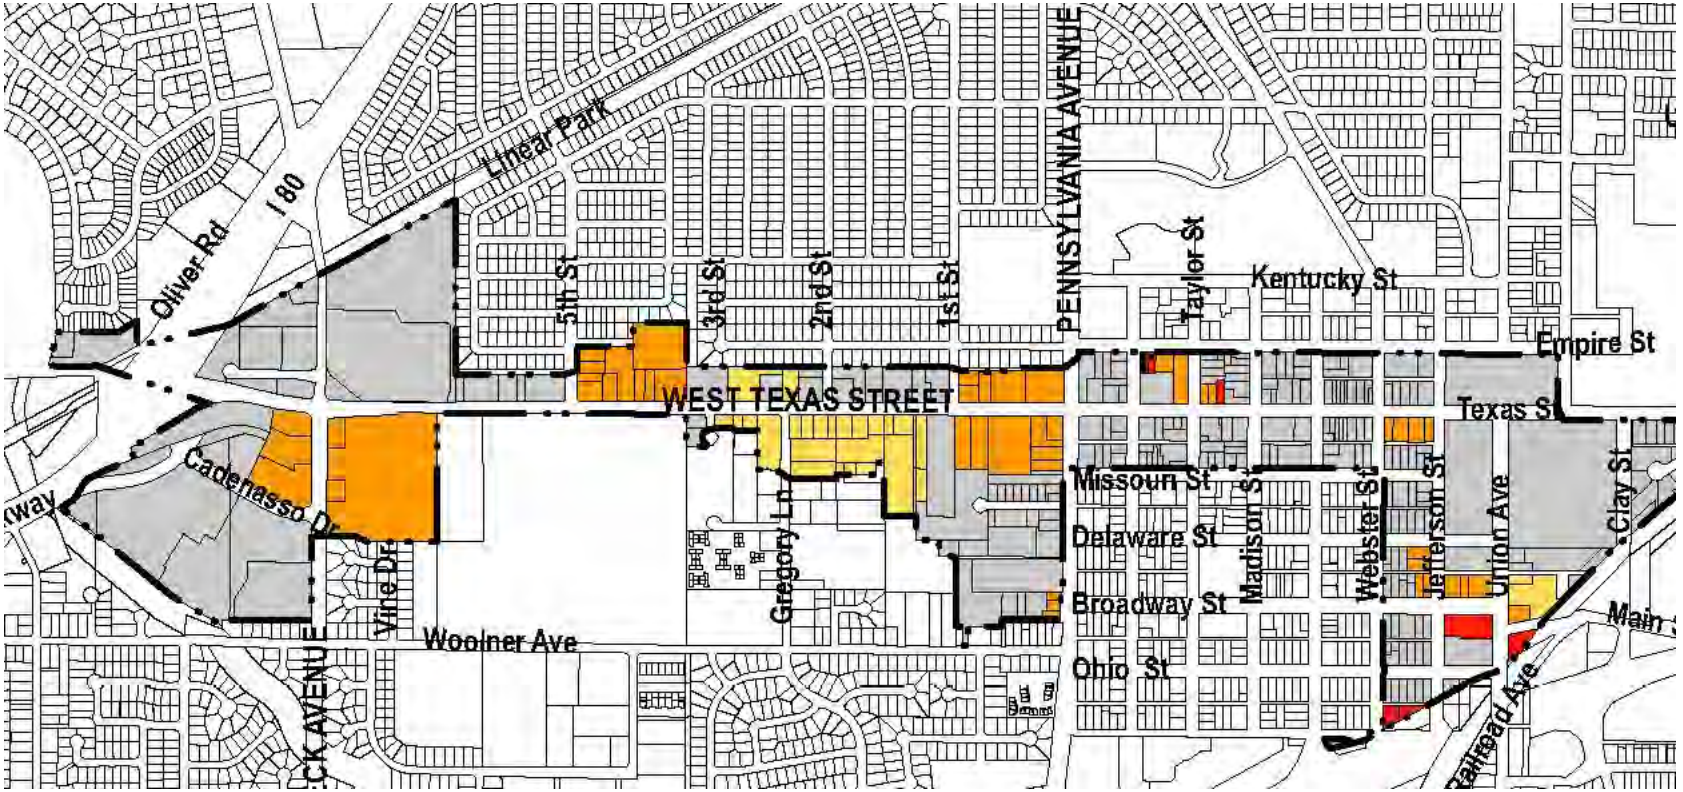


Proposal is to Expand to 1600 Spaces by Constructing a 5 story 1200 Space Parking Structure to Replace the 240 space surface lot.

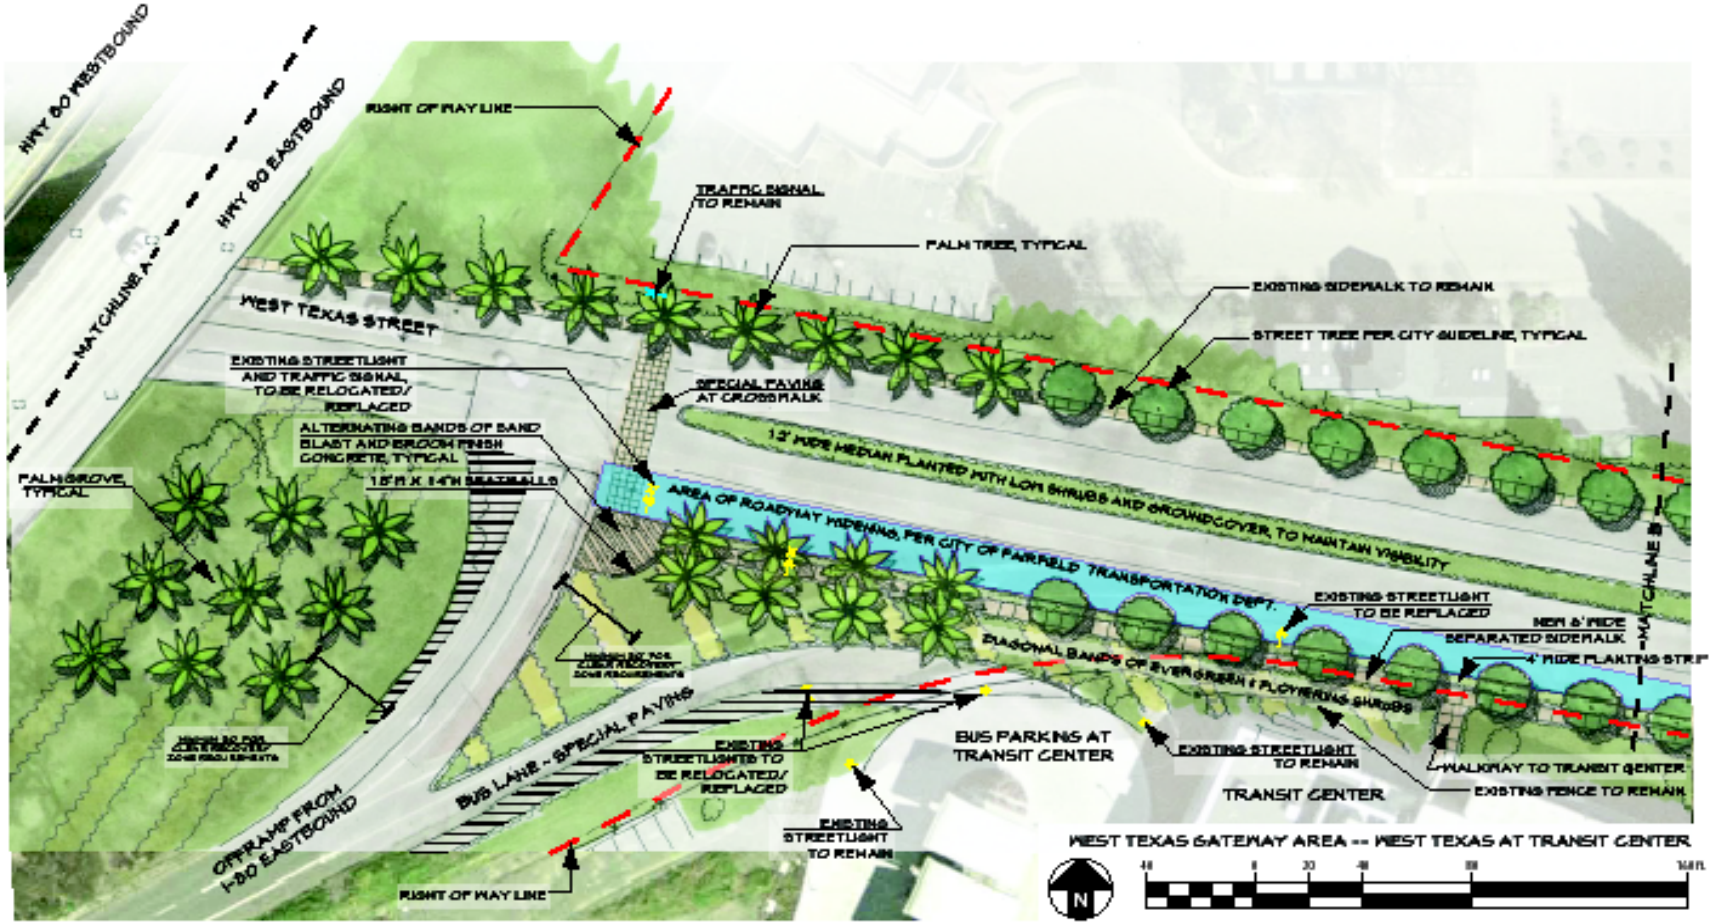
Includes Access Improvements for Pedestrians, Bicyclists, and Transit



FTC is Anchor for the West Texas PDA - Many Opportunities to Convert Old Highway Strip Development Into An Integrated Higher Density Mixed Use Community That Would Utilize and Support Transit, Walking, and Biking



Landscaping Designed to Form Gateway to the PDA to Set Tone for Redevelopment



Current View Emerging From West Texas U.C.

Future View Emerging From West Texas U.C.

Encourages Mixed Use Development in PDA

Major Regional Air Quality Benefits

- 960 People from SOV to Transit & Vanpools
- Daily VMT Reduction of Over 60,000 miles
- Congestion Reduction for I-80 and I-680

Minimal Local Air Quality Impacts

- No Impact on Truck Traffic
- No Increase in Bus Volumes
- Direct Access Cuts ½ mile for 20% of Buses
- Improved Bike and Ped Access To Transit
- Only Minor Mitigation Needed for Increased Automobile Traffic on Local Streets
- Gateway Landscaping to Stimulate PDA

The City of Fairfield is requesting an Air Quality Conformity Task Force Determination that the Fairfield Transportation Center Expansion and Access Improvement project is not a project of air quality concern.
