Programming and Allocations Committee**

MTC Resolution No. 4035, Revised

**Subject:** Transit Performance Initiative (TPI) Investment Program (\$19 million in funding for TPI Investment Round Two, and scope determination for \$4 million for SFMTA Round One project); addition of SMART to Clipper® small operator funding (previously approved); shifting of \$500,000 of federal funds within Freeway Performance Initiative.

**Background:** **Transit Performance Initiative – Investment Program, Round 2**  
The TPI Investment program funds low-cost capital investments that can improve operations and customer experience on major transit corridors and systems, and that can be implemented rapidly. In October 2012, the Commission committed \$82 million in federal Cycle 2 STP/CMAQ funds to the Transit Performance Initiative (TPI) Investment Program. To date, \$36 million has been programmed from TPI Investment funds. \$28 million was programmed through the first round in April 2012. In March 2014, the Programming and Allocations Committee authorized a call for projects for a \$19 million Round 2 competitive program, and the Commission approved an \$8 million investment from TPI Investment funds for small operator Clipper® implementation.

Project Selection Process

MTC issued a call for projects for Round 2 in March and received seven applications from six agencies, with a total request of approximately \$42 million (summarized in Attachment A). MTC staff convened an evaluation panel consisting of staff from MTC, transit agencies, and a representative of the MTC Policy Advisory Council. Submissions were scored against program fit, project readiness, project management capacity, travel time savings, operating cost savings, benefits to existing and new riders, service frequency, and passenger volumes.

Funding Recommendations

Staff recommends funding elements of five projects for a total of \$19 million, as shown in Attachment A. A local funding match of at least 11% is required. The recommended grant awards fund project elements that improve speed, reduce travel times, increase travel time reliability, enhance customer experience, and can be implemented in 18-24 months consistent with program objectives. Together, these projects are estimated to save over \$1 million in annual operating costs and reduce travel time along the corridors by 10-30 percent for the approximately 74 million annual riders on these routes. Fact sheets for the recommended corridors are attached.

Collaboration with NextGen Arterial Operations Program

MTC's Next Generation Arterial Operations Program (NextGen AOP) was established this year using CMAQ funds to assist local agencies in implementing advanced technologies to better manage and operate arterial roadways.

Due to the converging objectives of TPI Incentive and NextGen AOP, two agencies (AC Transit and LAVTA/City of Dublin) applied for both programs. Staff recommendations, to be presented at the September MTC Operations Committee meeting, will include funding for both of these projects. The

combination of TPI and NextGen AOP funding would fully fund the Dublin Boulevard project. Staff recommendations between these two funding programs are also shown in Attachment 1. MTC has previously allocated \$3.8 million in federal and local funds for NextGen AOP. Staff requests shifting \$500,000 in federal funds within the Freeway Performance Initiative to NextGen AOP, bringing the total NextGen AOP program to \$4.25 million. (The \$4.25 million is a sub-component of the Program for Arterial System Synchronization as shown in MTC Resolution No. 4035, Revised.)

**Transit Performance Initiative – Investment Program, Round 1**

The first round of the TPI Investment program recommended programming \$4.1 million to SFMTA for Transit Effectiveness Project (TEP) improvements and conditioning the release of these funds for implementation of bus or light rail stop consolidation and roadway modifications consistent with the TEP. SFMTA has submitted an application for such work on 9-San Bruno and 9L-San Bruno Muni bus routes. Staff recommends approving the \$4.1 million in TPI Investment Round 1 funds for this project.

**Small Operator Clipper® Implementation – SMART Inclusion**

In March 2014, the Commission committed roughly \$11 million, including \$8 million of TPI Investment funds, for the Clipper® Implementation on transit services in the Napa/Solano, East Bay, and 101-Corridor/North Bay areas. Preliminary cost estimates indicate that there will be some savings available within the \$8 million, which could be used to additionally implement Clipper® on the Sonoma Marin Area Rail Transit (SMART) system. Staff recommends including SMART as an eligible agency for this phase of work.

**Issues:**

1. Staff recommends conditioning the \$8 million recommended for the VTA Mountain View Light Rail Double Track Phase 1 project on demonstration of full funding for Phase 2 before the funds are programmed in the Transportation Improvement Program (TIP). Due to the aggressive schedule of Phase I, VTA has requested and staff recommends providing the federal funds through an exchange with Preventive Maintenance. Other local funds will fund the TPI project.
2. Due to the development and adoption schedule for the 2015 TIP, projects awarded TPI Investment Round 2 grants are scheduled to be amended into the TIP in December 2014. Further, due to the limited programming capacity available for STP/CMAQ funding this year, projects may not be able to obligate funds until 2016 or 2017.

**Recommendation:** Refer MTC Resolution No. 4035, Revised to the Commission for approval.

**Recommended TPI Funding: \$8.0 M**

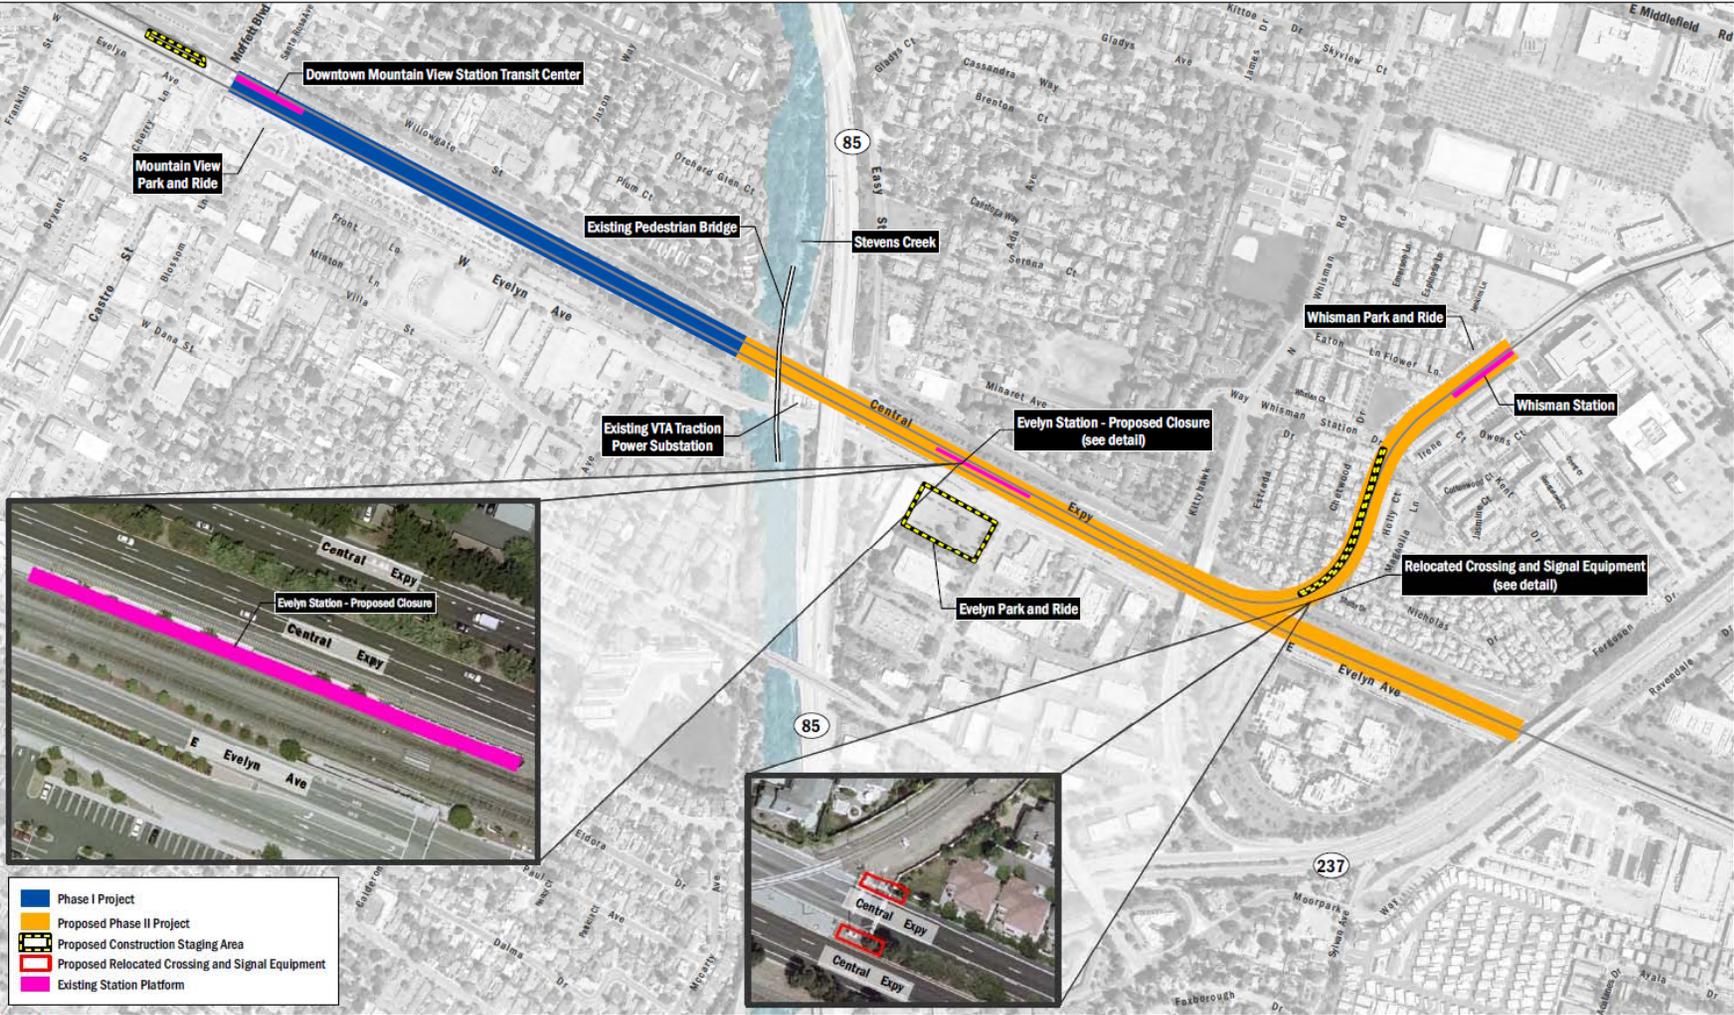

Estimated Total Project Cost: \$26.0 M

Lead Implementing Agency/ Sponsor: VTA

---

- Project Location:** Current single-track section of VTA’s Mountain View – Winchester Light Rail line. Phase 1 runs from Downtown Mountain View Station Transit Center to State Route 85 crossing.
- Project Description:** Phase 1 will add a second light rail track over a distance of approx. 1,400 feet by extending the existing storage track, and construct a replacement storage track to provide storage for two three-car trains. Phase 2, to be funded by other sources, will construct an additional 3,000 feet of track between State Route 85 and Whisman Station.
- Project Benefits:** Phase 1 is estimated to have slight improvements in reliability and running times. However, when combined with Phase 2 (demonstration of full funding of Phase 2 is a condition of this TPI recommendation), the project will allow VTA to implement a new line of service between Alum Rock and Downtown Mountain View, which will reduce travel time by an estimated 18% between the two stations. This new line will also allow Express service between major trip generators, which will reduce travel time by an estimated 30% for those trips. Ridership is also expected to increase as a result of these improvements.
