MRN	MRN070002	Mill Valley	Mill Valley - Miller Avenue Rehabilitation	Mill Valley: Miller Avenue: Pavement resurfacing, reconstruction of bicycle lanes, modifications to traffic islands, and improvements to sidewalk facilities.	The City is in the process of adopting a Miller Avenue Precise Plan. This plan will identify proposed modifications to the roadway alignments, changes to the service road locations, sidewalk locations, and placement of bicycle lanes. This work is anticipated to be undertaken in 2006. Once this work is completed, a more specific construction plan can be described. It is anticipated for planning purposes that all of the asphalt pavement will be ground down approximately 6 inches. The center crown will be lowered sufficiently to create a network of usable bicycle lanes on both sides of the road. In addition, median parking may be reconsidered, turn lanes may be included, and Bus stops will be evaluated for any necessary relocations, along with enhancing sidewalk paths of travel and wheelchair accessibility.	Safety - Pavement resurfacing or rehabilitation
